ENFORCER[®]
TRANSPORT SECURITY, INC.

AIR CUFF LOCK
#3000 & #3030

Covers and locks air valve levers on truck to prevent the truck and trailer brakes from being released.

Customized Keying Solutions

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Heavy Duty Cylinders

ABLOY lock cylinders utilize rotating discs instead of the traditional springs and pins. Cylinder keyway face spins freely to prevent drill bits from penetrating the lock.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your padlock, Air Cuff Lock* and Adjustable Trailer Locks can all be keyed alike. One key opens all of your locks.

Air Cuff[®] Air Brake Lock

Constructed of thermoformed, high impact resistant Polycarbonate material, the ENFORCER[®] Air Cuff[®] Lock completely covers and locks the dash mounted air valve levers to prevent the truck and trailer brakes from being released. This lock is an additional layer of security for trucks that are unoccupied, parked or idle. The unit is portable and easy to install with no drilling or permanent installation parts required. ABLOY[®] cylinder is included. Air Cuff Lock #3000 fits most trucks. The #3030 has an angled back to fit the dashboard on International ProStar trucks and other models.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
