

**Protects side
or rear door
padlock from
tampering.**

AVAILABLE WITH ABLOY 350 or
341/25 PADLOCK

Customized Keying Solutions

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your ABLOY padlock, Air Cuff Lock* and Hasp Lock can all be keyed alike. One key opens all of your locks.

Heavy Duty Hasp Lock for Trailers and Containers

The ENFORCER[®] #8014 heavy gauge stainless steel hasp fits over the door frame with double thick welded tabs to protect the padlock from unauthorized removal. This side or rear door hasp is easy to install for maximum security on all trailers, reefers, dry vans and containers. Hasp is typically paired with a heavy duty ABLOY[®] padlock. ABLOY padlocks utilize rotating discs instead of the traditional springs and pins. This type of construction allows for reliable function in extreme environments. Each set serves as its own template and comes complete with hardware and slide covers for inside fastener protection.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
