

THE
ENFORCER[®]
TRANSPORT SECURITY, INC.

**LANDING GEAR
LOCK #1213**

**Covers and locks the
landing gear handle.**

AVAILABLE WITH ABLOY
341/25 PADLOCK

**Customized Keying
Solutions**

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your padlock, Air Cuff Lock* and King Pin Lock can all be keyed alike. One key opens all of your locks.

Landing Gear Lock for Trailers and Containers

The ENFORCER[®] Landing Gear Lock is easy to install. It is a heavy gauge high carbon steel lock box that covers and locks the landing gear handle. When locked in position, the handle cannot raise or lower the landing gear. The Landing Gear Lock can be purchased without a padlock (#1213) or with an ABLOY[®] 341/25 padlock (#1213-C). ABLOY lock cylinders are designed with rotating discs, like the tumblers in a bank safe, instead of the traditional springs and pins. This type of construction allows for reliable function in extreme environments as well as various master keying systems. Cylinder keyway face spins freely to prevent drill bits from penetrating the lock.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
