# COMPREHENSIVE PHYSICAL SECURITY AUDIT FOR TRUCKS AND TRAILERS

## TRAILER

- Lock is visible on the back and side doors of the trailer.
- Trailer lock is made of high-quality, stainless or hardened steel.
- Factory-installed trailer latches have been upgraded to a reinforced hasp on all swing doors (including side doors).
- High security aftermarket locking device is in use.
- Roll up door automatically locks when the trailer door is closed.
- Lock is in place to protect the security seal if applicable.
- Padlock performs in harsh weather conditions.
- Landing gear lock is in use when parked.
- King pin is protected when the trailer is dropped.
- Glad hand lock is available for use.

## TRUCK

- Truck is protected with a physical security device when idling or unattended.

## KEYS

- Key controls are in place for trailer locks.
- Keys for trailer locks are patented by the manufacturer.

## POLICY

- Physical security policy is in place.
- Regular physical security audits occur.
