

THE
ENFORCER[®]
TRANSPORT SECURITY, INC.

STEERING LOCK
#2500-8

**Locks joint on the shaft
in the engine bay to make
steering impossible.**

AVAILABLE WITH ABLOY
341/25 PADLOCK

**Customized Keying
Solutions**

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your padlock, Air Cuff Lock* and King Pin Lock can all be keyed alike. One key opens all of your locks.

Steering Lock for Trucks

The ENFORCER[®] Tractor Steering Joint Lock quickly adds theft protection. The lock slips into the universal joint on the shaft in the engine bay on most tractors to make steering impossible. The insert is formed from heat treated chrome plated steel and secured with an ABLOY[®] 341 high security padlock. Keyed to one of 360 million combinations, the unit provides maximum theft protection with the minimum of driver effort.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
