

How to Find Your Key Code

Your key code tells us exactly which key to cut. It's stamped right on the lock or the key. Where it's stamped depends on the product. Find yours below.

Padlocks

The code is stamped on the **side edge** of the lock body.

Keys

The code is stamped on the **top of the key**. Don't look on the side of the key, it's not there.

King Pin Lock (Model 1113)

The code is on the **side**, just under the logo.

Air Cuff Lock

The code is on the **bottom piece** of the plastic.

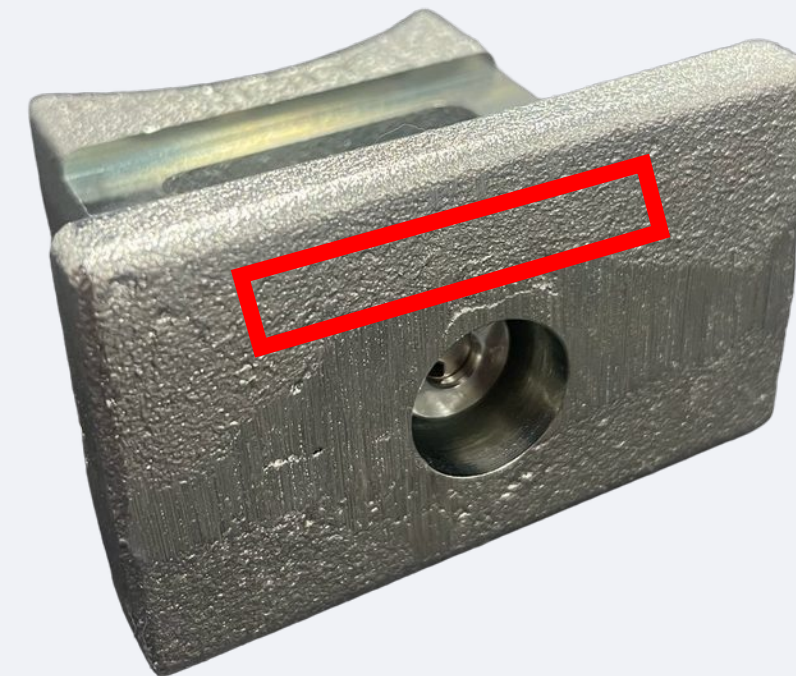

Glad Hand Lock (Model 1450)

The code is on the **cylinder**.

King Pin Lock (Model 1111)

The code is on the **drawer**.

Roll-Up Door Locks

The code is on the **top or the side**. Check both.
